Our goal is to provide our customers with excellent service while maintaining the health and safety of our customers, the communities we serve and our employees. Therefore, during this time of heightened concern we may employ various options to help adjust and process auto, home and business claims. Some of these options may include the following:

- Virtual inspections, including real-time video chat;
- Digital communications featuring the ability to upload photos and videos of the damage;
- Inspection of your auto, home or business through a Mercury-approved emergency service vendor, contractor or independent adjuster; and
- An in-person inspection by our staff when necessary.

Mercury is closely monitoring and applying CDC recommendations should your claim require an in-person visit by our staff.
